Summary: Every time I try to work on my story for this category, I keep being assaulted by plot bunnies! So I'll post them here to get them out of my head, so I can keep writing. If you want one, feel free to take it home with you!

Crossover Ideas HP009

**Crossover Ideas: HP009**

Alternate Version of Magica Cyborg 009

I seem to have an obsession with this crossover category, I have too many ideas for this but I'm already committed to writing _**Magica Cyborg 009**_, so I'll post the ideas and let someone else write them! My only request is that, if you do adopt the idea, please let me know and send me a link!

The first idea is an alternate version of _**Magica Cyborg 009, **_where Black Ghost is making a new set of cyborgs to combat the 00-numbers. I'll put up the prompt, and people will be free to run off into the sunset with it like panty thieves from an anime. Just credit me with the idea if you post it!

.

Here's how it goes:

Black Ghost scientists have discovered that certain people seem to possess a strange, natural energy that, as far as they know, has never been previously recorded. Intrigued by the potential, and still peeved off by the escape of the 00-cyborgs, Commander Skull has people with this power abducted (as they don't seem to have any paper-trail that would lead officials to notice their absence), and used to make new cyborg to fight the 00-numbers.

Harry is the first to be kidnapped as he is a "known delinquent" and therefore won't be missed. His aunt and uncle are paid off to abandon

their nephew and move to a different city, so that no one can realize what's happening.

Harry is given similar powers to 002, (flight and a Mach 5 Accelerator, they don't want him too powerful in case he also tries to rebel against them). The scientists _tried _to use the Cyborgman programming on him, but his magic (which they call flux since they don't actually know what it is) would destroy the computers every time they started. Eventually, they decide to trick him by making up a story about the "Evil" 00-numbers to convince him to work for them. This only sort-of works, Harry agrees with them, but can't shake the feeling that something isn't right.

.

.

So far my ideas for Cyborgs are two canon Harry Potter Characters and two OCs (sorry guys, I promise they aren't Mary sues!). Here's the list, with their names, powers, nationalities, and personalities. I'll throw in a few extra things too.

~Harry Potter (British, Male): Cyborg powers, Flight and acceleration; specialty magic, Defense Against the Dark Arts- A traumatized teenager who's become disenchanted with the world of magic and thinking of leaving for good as soon as he's old enough. Maybe sooner. Knows he has a loose sense of morals due to his abusive upbringing, but tries to hide it.

~Draco Malfoy (British, Male): Cyborg powers, Wolverine-esque claws and fire breath; Specialty magic, Potions- A self-righteous, pureblood heir who's being forced to see that those he's been taught to look down on aren't as useless or stupid as he was taught to believe. Has a fierce, one-sided rivalry with Harry and is frustrated by the fact that Harry has begun to dismiss him.

~Asp Santino (Italian, Female): Cyborg powers, Telepathy and basic psychokinesis; Specialty magic, plant magic- A soft spoken girl from Italy. Is always covering her eyes, and secretly watching the people around her. She is incredibly blunt and straight forward when she speaks. Her family magic focuses on golems made from plants, but she hasn't really how to do that yet. She is a homosexual.

~Jean Marshall (American, Female): Cyborg powers, Shapeshifter; Specialty magic, charms- A budding actress at school who wanted to someday work on tv. Jean is very energetic and hyperaware of the emotions of the people around her and a lot more insightful than people think. Is simply fascinated by the fact that she can now run around without tripping over her own feet anymore. She is a metamorph-magi. Bisexual leaning towards homosexual.

.

I need to state this if anyone asks, all the magical cyborgs have _weaker _powers than the original ones! Harry can't fly quite as fast as 002, Draco's flames aren't as hot as 006's, Asp can't teleport or create barriers like 001, and, unlike 007, Jean can only turn into animals. For most of them, their magic makes up the difference (though Draco was given claws for close combat).

Oh, and if any one's wonder about the Jean not tripping comment. It comes from the fact that, for most metamorph's subconscious minds can't keep up with the changes their bodies are constantly undergoing. With their height and shape always changing, their brains can't remember just how far everything is from them. It's like reaching for a glass no-one's mentioned they've moved slightly. You're more likely to knock it over than pick it up.

.

.

Anyways, if you decide you want to use this, go right ahead! And you don't have to use my OC's if you don't want to. They were kinda just space filler when this idea first came to mind.

End
file.
